WHAT IS A MORTGAGE CREDIT CERTIFICATE/MCC?

In 1984 Congress passed the Tax Reform Act as a means of providing housing assistance to families of low and moderate income. This was the creation of today's MCC Programs.

The MCC is a tax credit that helps reduce the amount of federal income tax due and provides additional available income to help a borrower qualify for a mortgage loan.

A home owner can access this credit for the life of the mortgage loan. The maximum TAX CREDIT annually can not exceed \$2,000.

Buyers may be subject to paying a federal recapture tax if they do not owner occupy the property as primary residence during the recapture period (usually 9 years.)

Mortgage Interest Credit (MCC) is a non-fundable tax credit, therefore the homebuyer must have tax liability in order to take advantage of the tax credit.

Tax credits are a powerful way of increasing a family's annual income.

WHAT DOES AN MCC DO?

Provides an income tax credit to the borrower as long as they own and occupy their home. The federal government already allows all homeowners to claim an itemized income TAX DEDUCTION for the amount of interest paid each year on the mortgage loan. A TAX DEDUCTION reduces the amount of income that is taxed.

The MCC Program takes a portion of the mortgage interest paid and turns it into a TAX CREDIT. A TAX CREDIT is an amount returned to the buyer either by increasing the amount refunded in their tax return or decreasing the amount of taxes owed.

(Dollar for Dollar savings)

Because the CREDIT is accessible for the life of the loan, an MCC may save a homeowner thousands of dollars during the life of the mortgage loan.

HOW DOES THIS WORK?

Here is a sample of one year of savings with the MCC Program :

The actual amount of the CREDIT will be determined by the interest the homeowners pays each year on their mortgage loan.

Loan Amount= \$100,000 Interest Rate= 6%

home owner pays \$6,000 in mortgage interest this year

MCC Program Tax Credit Rate= 30%

$\$6,000 \times 30\% = \$1,800$

MCC TAX CREDIT for the Homeowner: \$1,800

* Maximum credit is \$2,000 a year.

PRELIMINARY NOTICE OF POTENTIAL RECAPTURE TAX

(TO BE DELIVERED BY LENDER AT MORTGAGE LOAN APPLICATION)

Because you are receiving a mortgage credit certificate with your mortgage loan, you are receiving the benefit of a credit against your federal income tax. If you sell or otherwise dispose of your home during the next nine years, this benefit may be “recaptured.” The recapture is accomplished by an increase in your federal income tax for the year in which you sell your home. The recapture only applies, however, if you sell your home at a gain and if your income increases above specified levels.

You may wish to consult a tax advisor or the local office of the Internal Revenue Service at the time you sell your home to determine the amount, if any, of the recapture tax. Within the next 90 days, you will be given additional information that will be needed to calculate the recapture tax.

NOTICE OF POTENTIAL RECAPTURE TAX

(TO BE COMPLETED BY LENDER AND DELIVERED TO APPLICANT AT THE TIME OF CLOSING OF THE LOAN)

A. INTRODUCTION.

1. *General.* When you sell your home you may have to pay a recapture tax as calculated below. The recapture tax may also apply if you dispose of your home in some other way. Any references in this notice to the "sale" of your home also include other ways of disposing of your home. For instance, you may owe the recapture tax if you give your home to a relative.

2. *Exceptions.* In the following situations, no recapture tax is due and you do not need to do the calculations:

- (a) You dispose of your home later than nine years after you close your mortgage loan;
- (b) Your home is disposed of as a result of your death;
- (c) You transfer your home either to your spouse or to your former spouse incident to divorce and you have no gain or loss included in your income under Section 1041 of the Internal Revenue Code; or
- (d) You dispose of your home at a loss.

B. *Maximum Recapture Tax.* The maximum recapture tax that you may be required to pay as an addition to your federal income tax is \$ _____ [insert the actual dollar amount resulting from the product of 6.25% multiplied by the highest principal amount of the mortgage loan]. This amount is 6.25% of the highest principal amount of your mortgage loan and is your federally subsidized amount with respect to the loan.

C. *Actual Recapture Tax.* The actual recapture tax, if any, can only be determined when you sell your home, and is the lesser of (1) 50% of your gain on the sale of your home, regardless of whether you have to include that gain in your income for federal income tax purposes, or (2) your recapture amount determined by multiplying the following three numbers:

- (i) \$ _____ [insert the actual dollar amount resulting from the product of 6.25% multiplied by the highest principal amount of the mortgage loan] (the maximum recapture tax, as described in paragraph B above),
